

How to share your code on GitHub

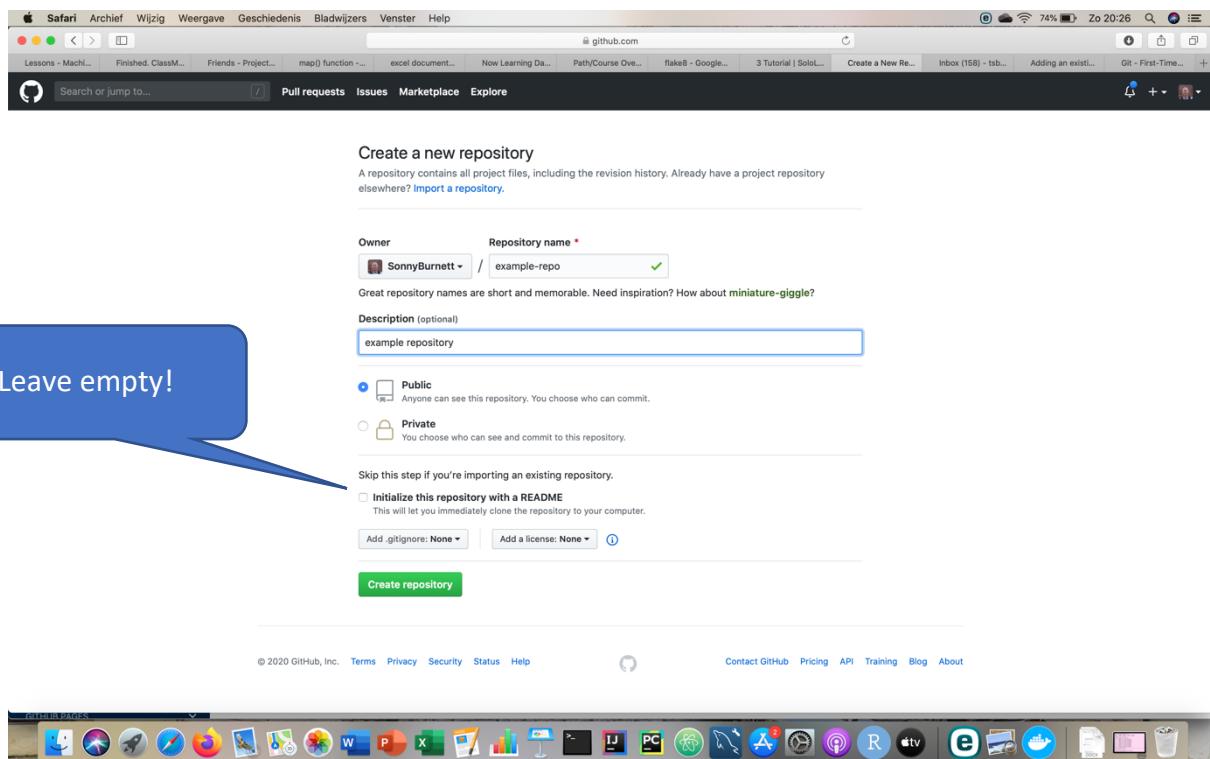

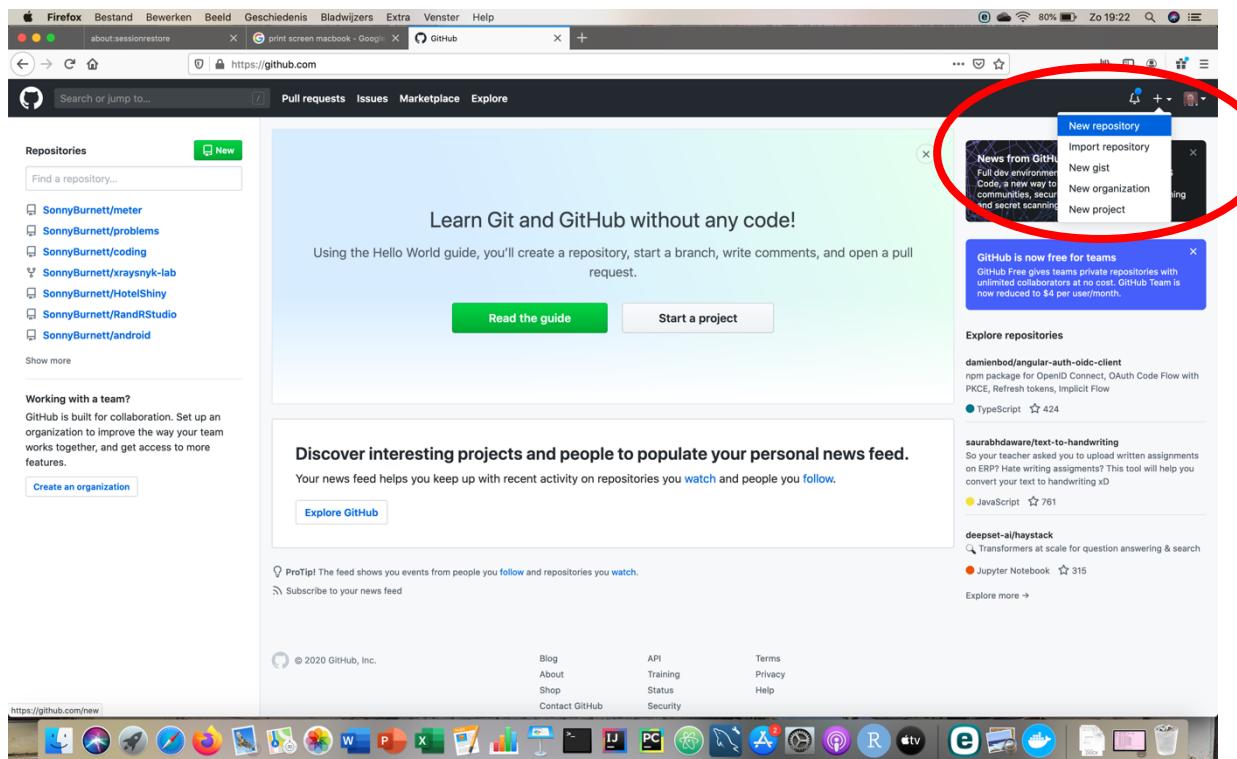

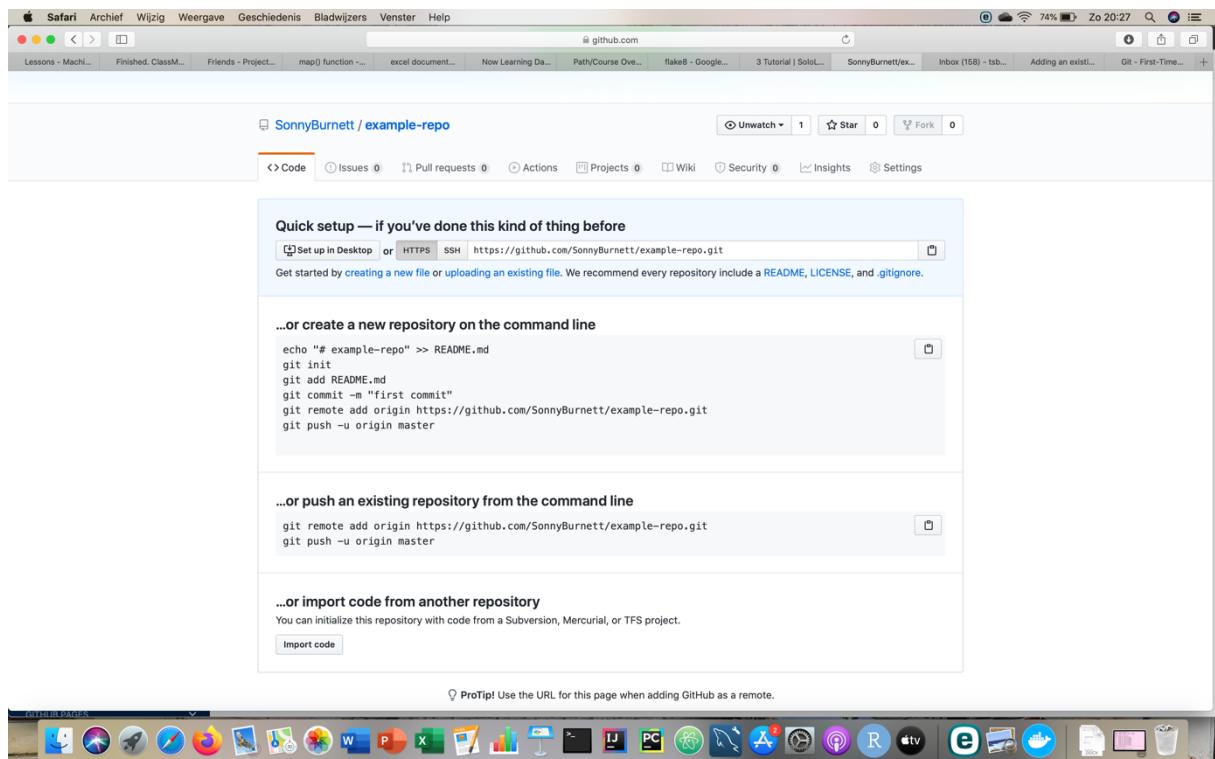

a visual guide

Command line

First create an empty repository on GitHub

Open a terminal

Go to the folder where you have stored your code.

Type these commands while replacing the yellow text for your own.

```
git init
git status

git config --global user.name "Taco Bakker"
git config --global user.email tsbakker65@gmail.com

git add .
git status

git commit -m "commit message, this is my first commit!"
git status

git remote add origin https://github.com/SonnyBurnett/example-repo.git
git remote -v

git push -u origin master
```

The easy peacy way

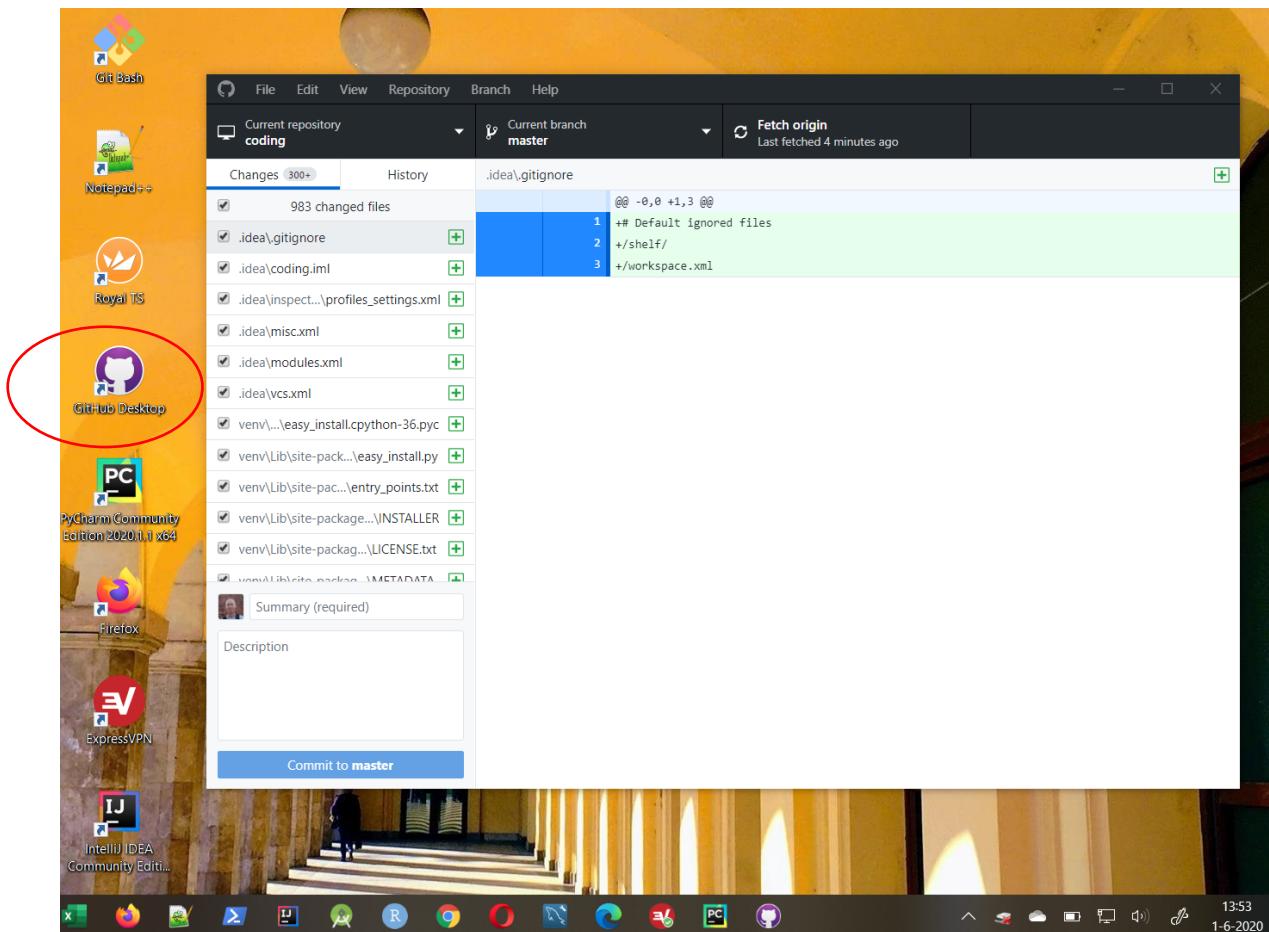

The screenshot displays a Mac desktop environment with two open Safari browser windows. Both windows are navigating to the GitHub URL github.com.

Top Window: This window is titled "SonnyBurnett / euler". It shows a commit history for the "master" branch. One commit is listed: "SonnyBurnett Initial commit" (commit hash: 25c1bf0, 1 hour ago). Below the commit history is a text editor for the "README.md" file, which contains the text "euler" and "euler code". At the top of the page, there is a navigation bar with links like "Code", "Issues", "Pull requests", "Actions", "Projects", "Wiki", "Security", "Insights", and "Settings". A green button labeled "Read the guide" is visible. The GitHub header bar at the top of the page includes links for "Lessons - Mac", "Finished. Class...", "Friends - Proj...", "map() function...", "excel document...", "Now Learning...", "Path/Course O...", "flake8 - Google...", "3 Tutorial | Sol...", "SonnyBurnett/...", "Inbox (158) - ts...", "Adding an exist...", "Git - First-Time...", and "SonnyBurnett/...".

Bottom Window: This window is also titled "SonnyBurnett / euler". It shows a large, empty rectangular area with a placeholder message: "Drag files here to add them to your repository" and "Or choose your files". Below this area is a "Commit changes" dialog box. It features a user profile picture, a title "Commit changes", and a "Commit directly to the master branch." radio button (which is selected). There is also an option to "Create a new branch for this commit and start a pull request." A "Commit changes" button and a "Cancel" button are at the bottom of the dialog.

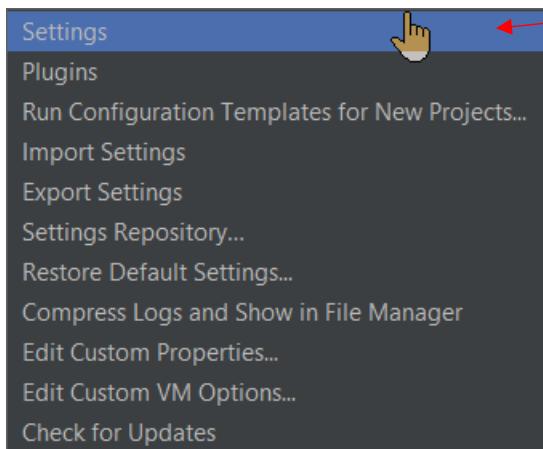

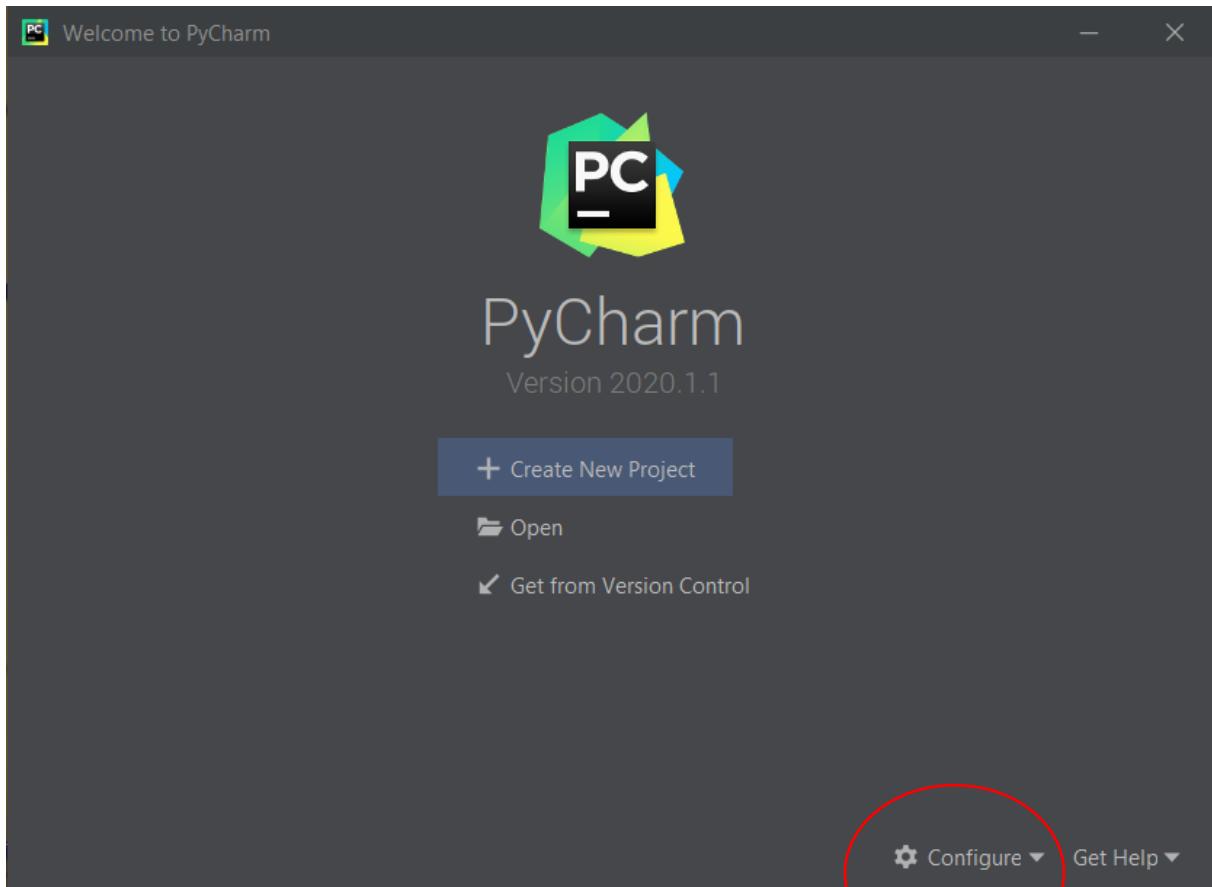

The Mac desktop's Dock is visible at the bottom of both screenshots, showing various application icons.

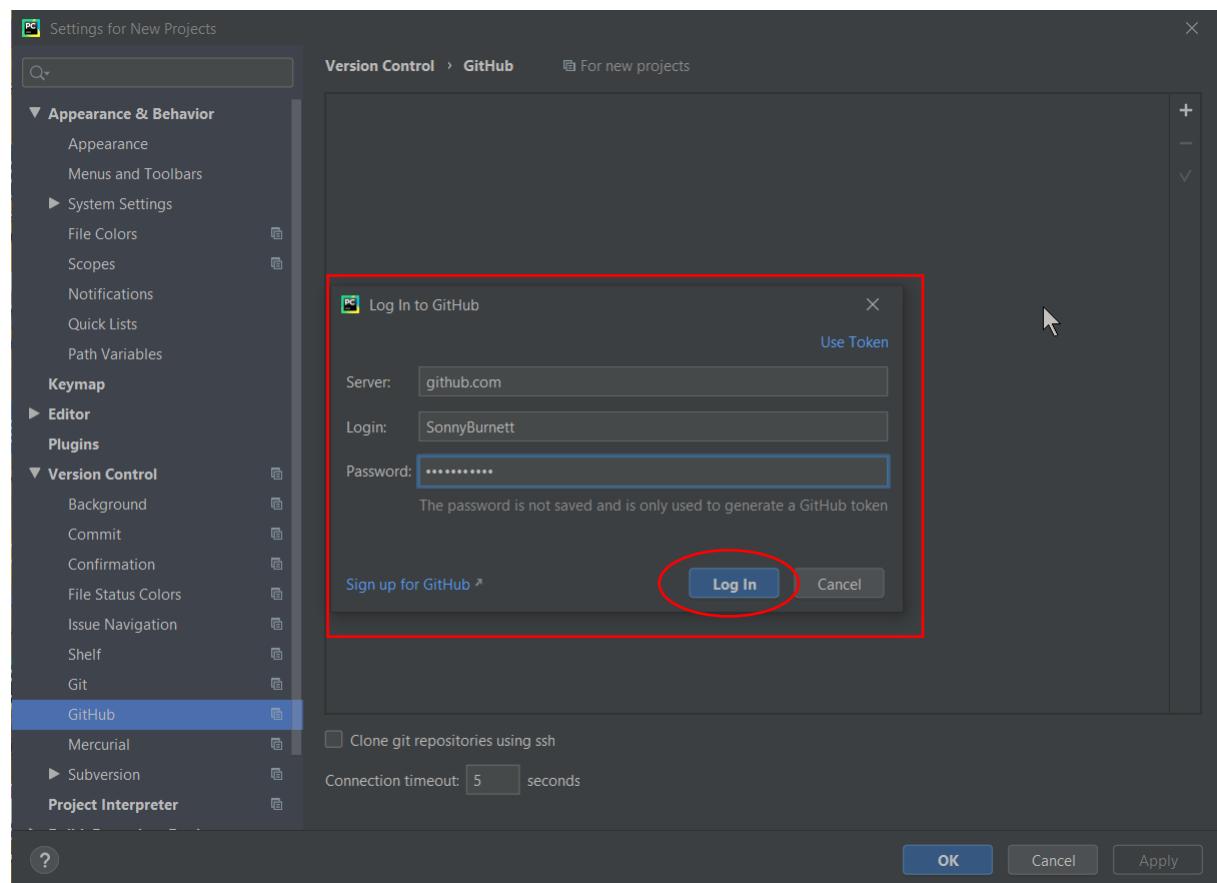

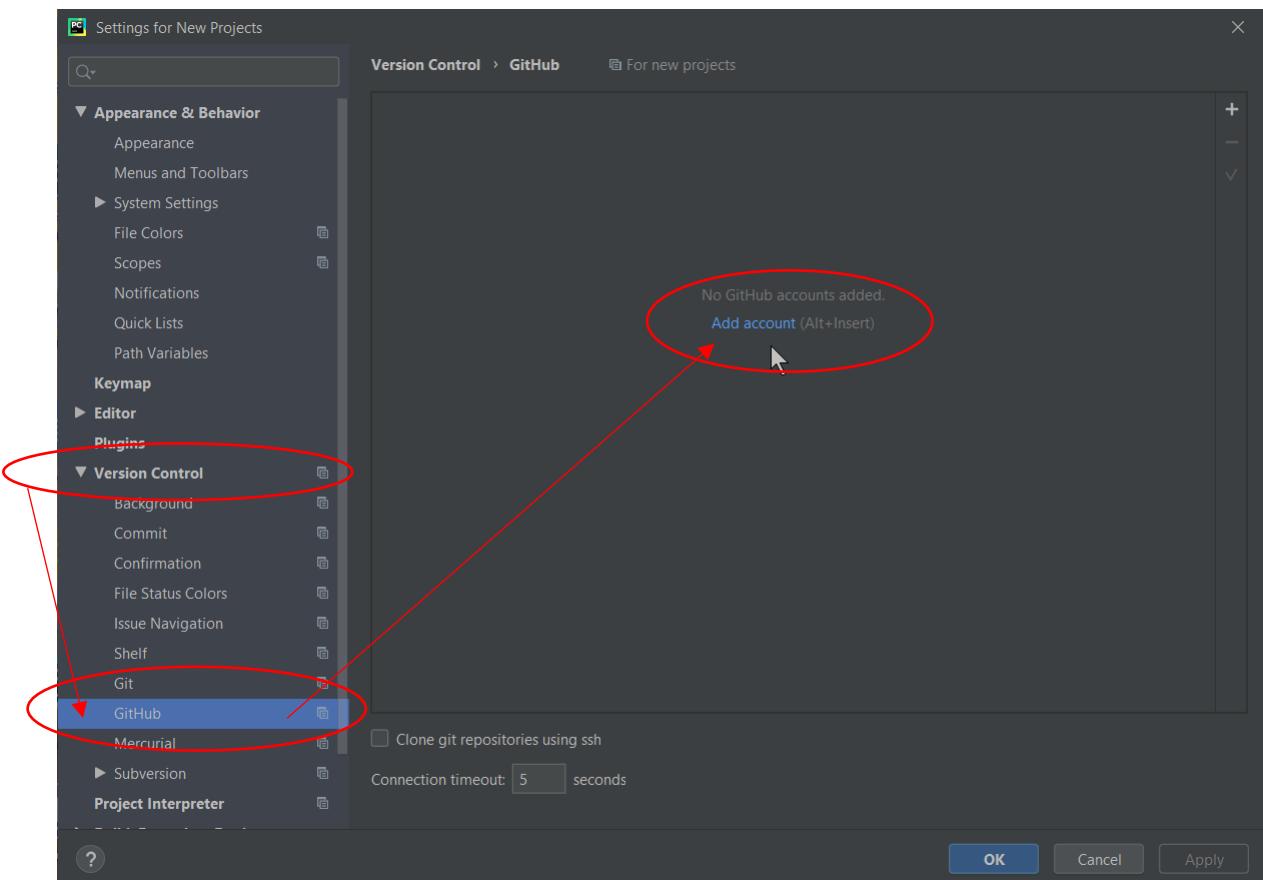

GitHub Desktop

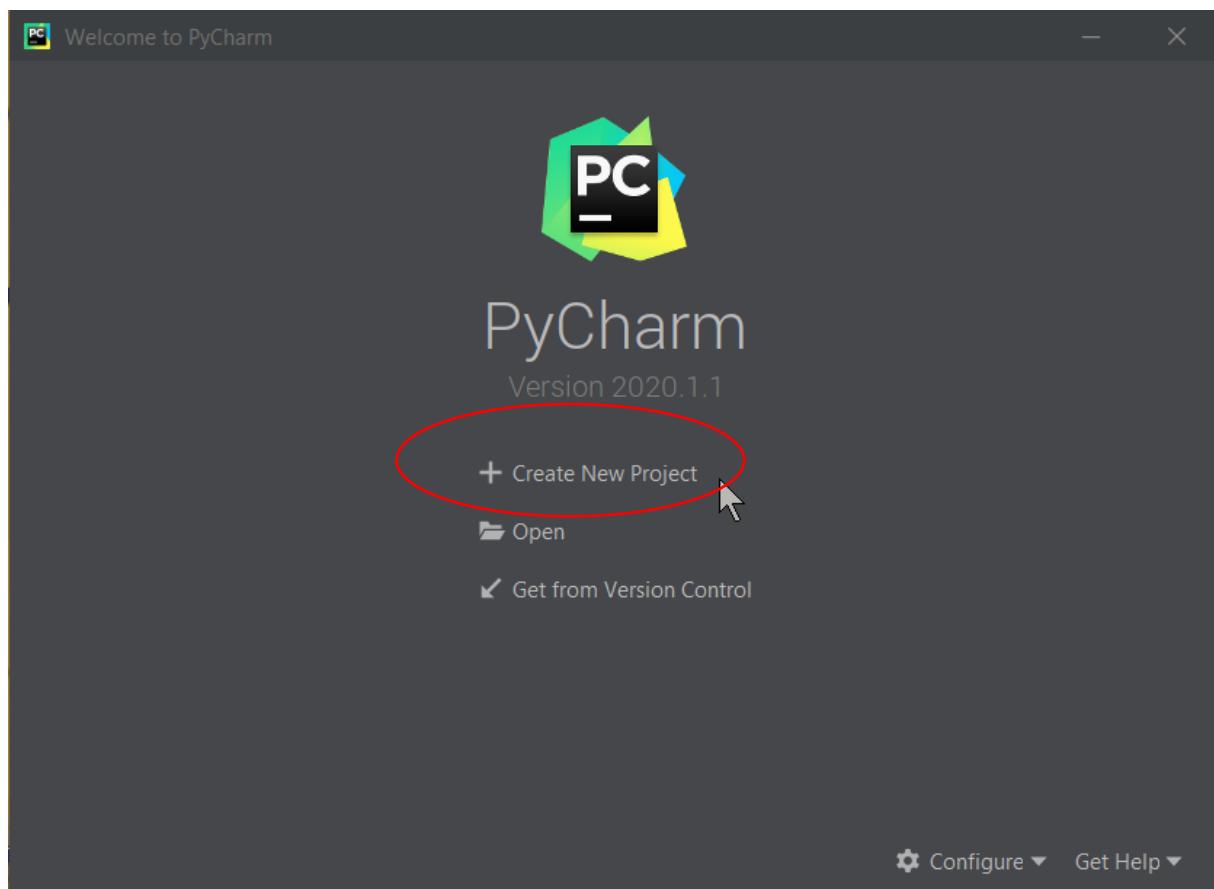

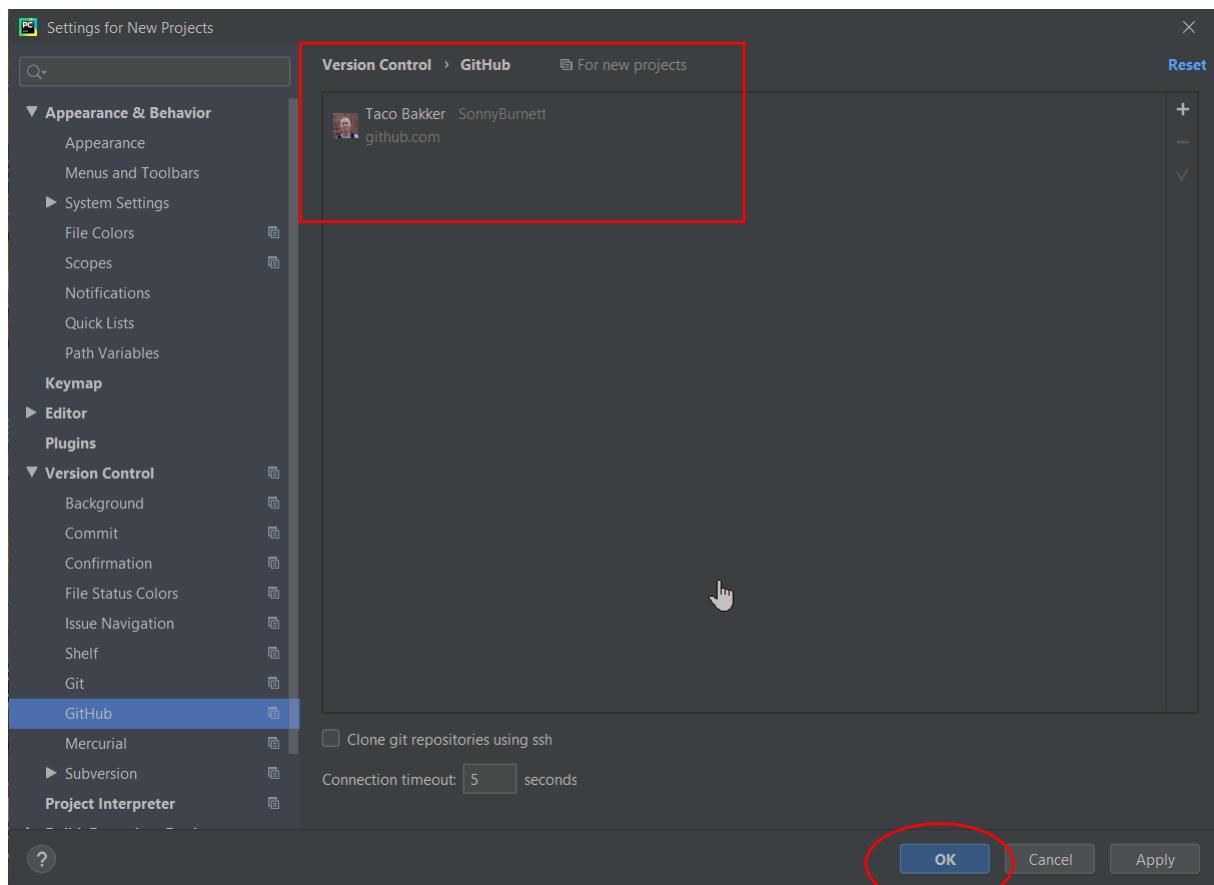

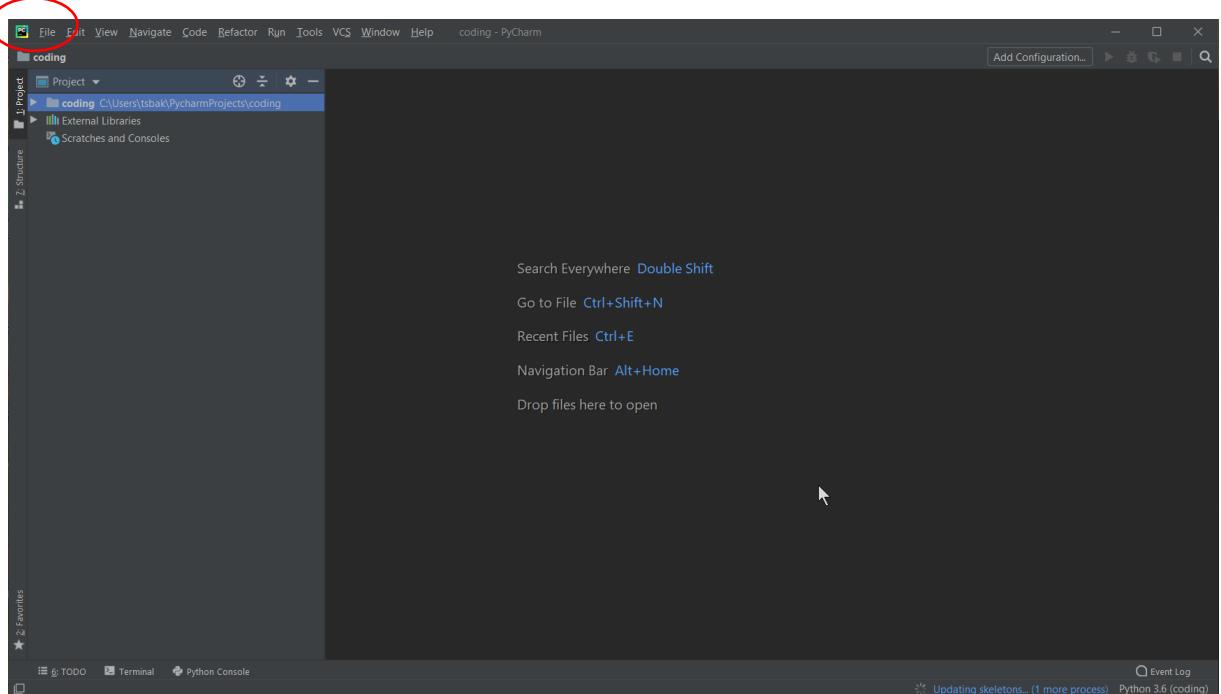

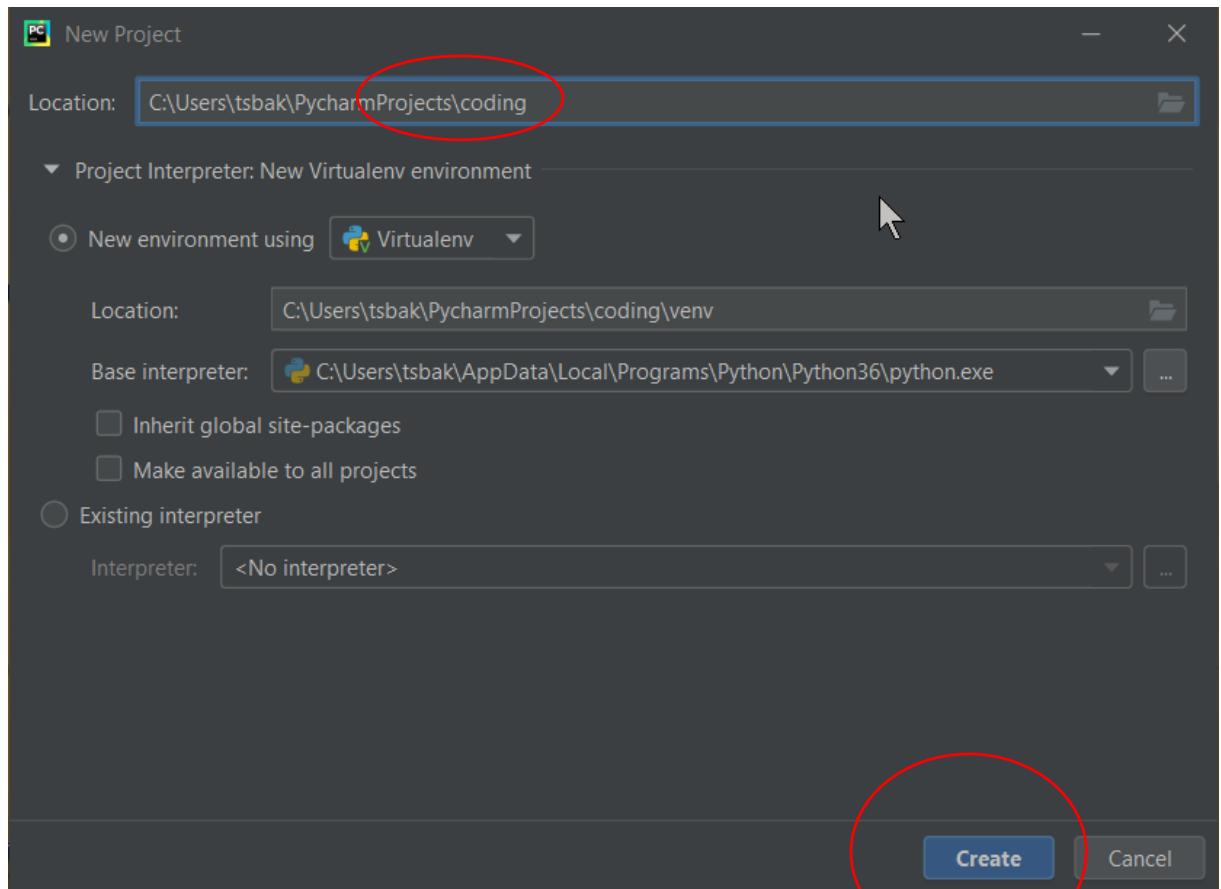

GitHub Desktop will not be explained in detail in this Guide.

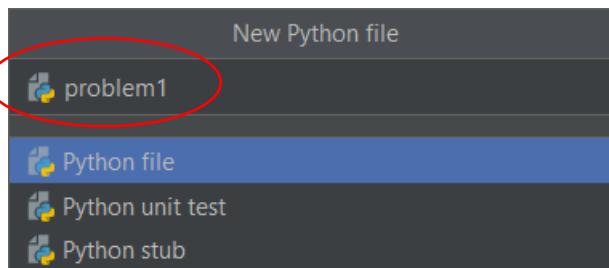

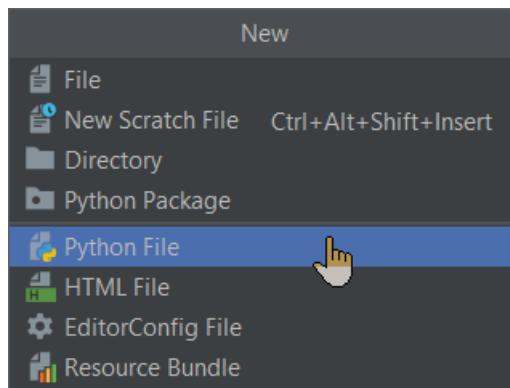

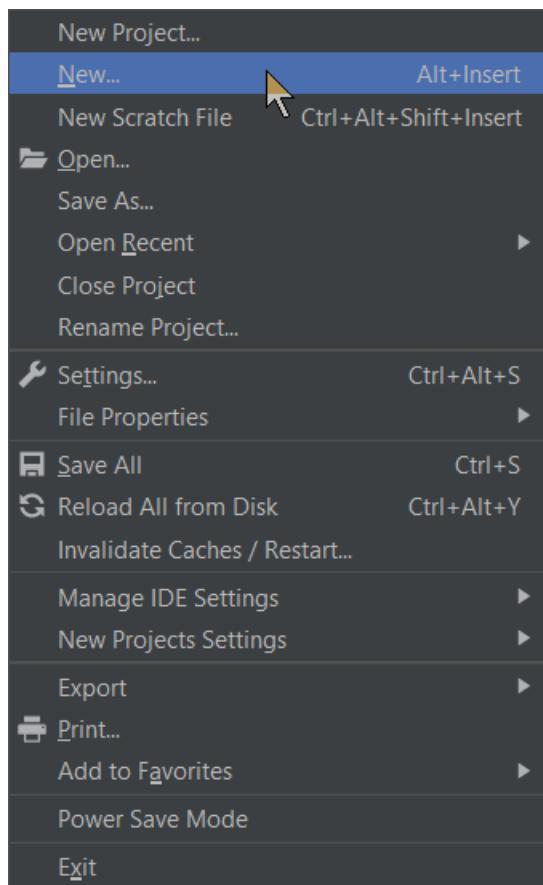

PyCharm

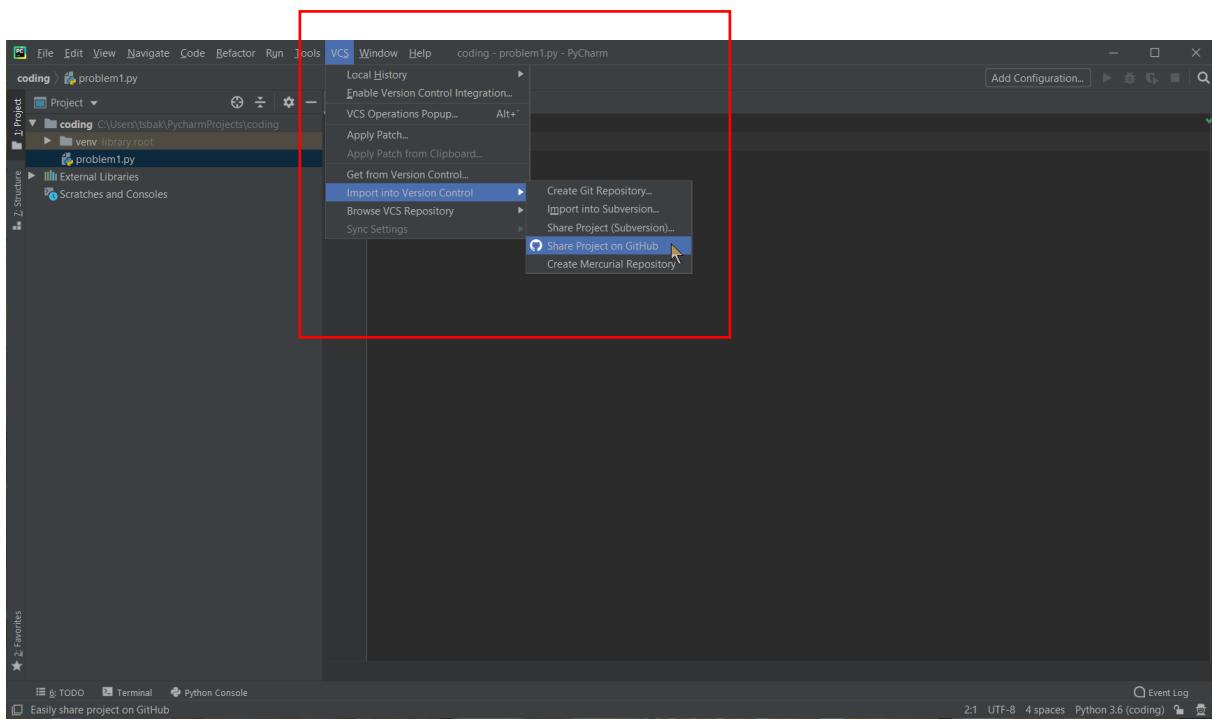

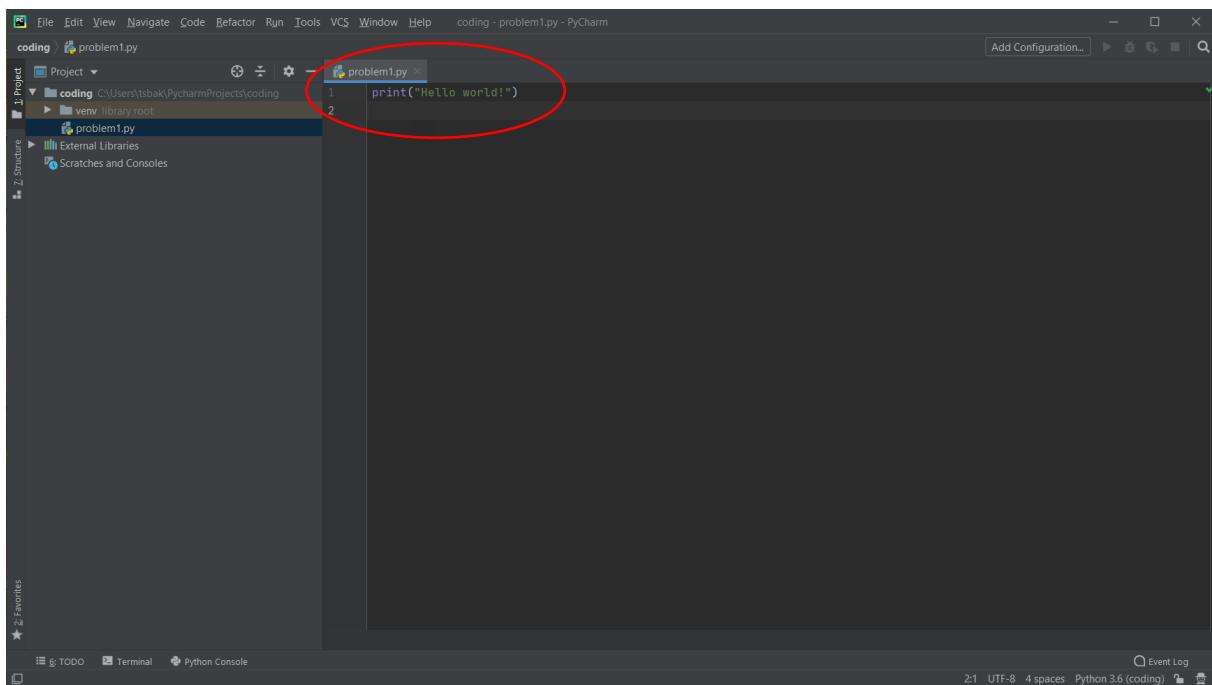

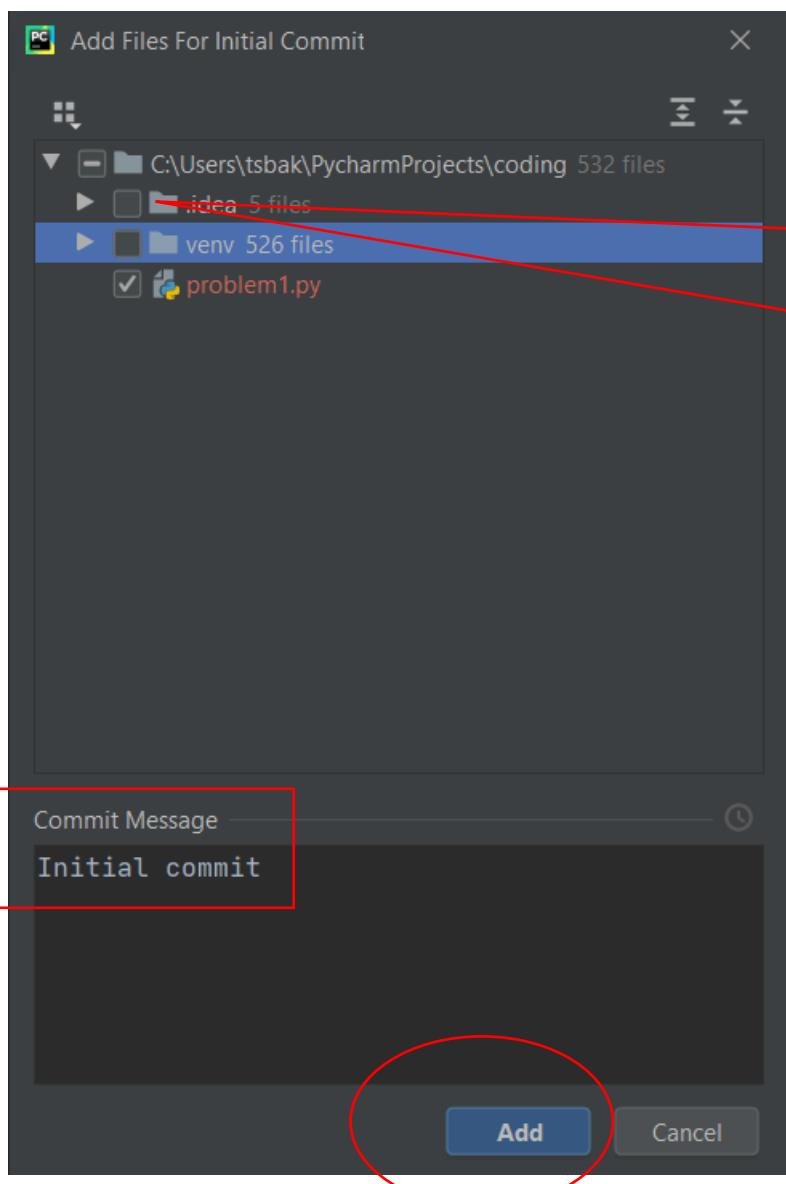

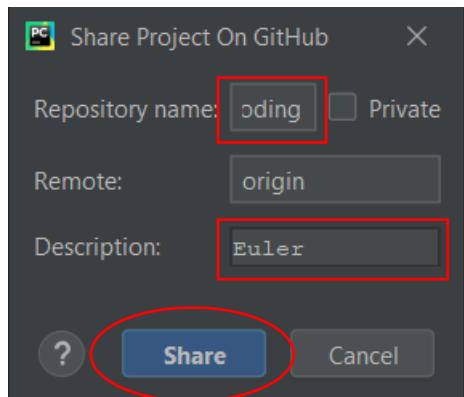

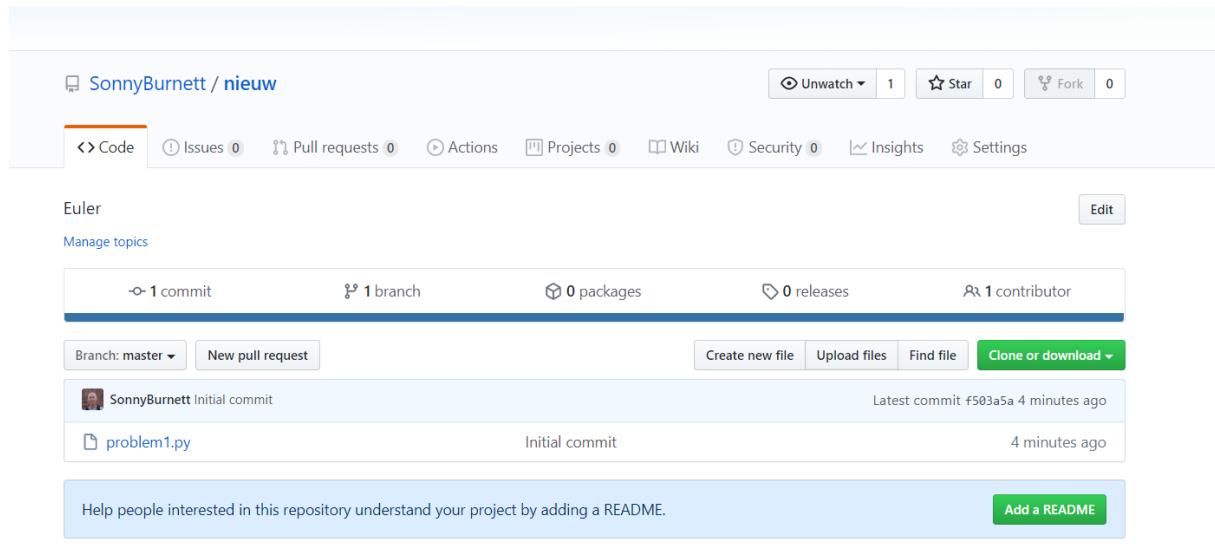

```
Git: Console Log Pull Requests
↑ 1 file changed, 1 insertion(+)
↓ create mode 100644 problem1.py
13:09:16.080: [coding] git -c credential.helper= -c core.quotePath=false -c log.showSignature=false push --progress --porcelain origin master --set-upstream
Total 3 (delta 0), reused 0 (delta 0)
To https://github.com/SonnyBurnett/nieuw.git
 * refs/heads/master:refs/heads/master [new branch]
Branch 'master' set up to track remote branch 'master' from 'origin'.
Done
```
